2-Bottle Wine Shipper

An easier more cost effective way to ship

Wine Shippers are used to protect your wine in transit, whether you are transporting bottles across town or shipping valuable wine across the country.

Each Wine Shipper uses Expanded Polystyrene (EPS) foam to cradle the wine bottles within a corrugated carton, making transportation safe and easy. EPS Foam (aka Styrofoam) is perfect for the job. It is lightweight, strong, and offers superior cushioning for delicate products. In addition, the foam & corrugated used in our packs are manufactured with completely recyclable and environmentally friendly materials.

We offer 1, 2, & 3-bottle-shippers, which can be expanded to 6 or 12 bottle packs. Corrugated shipping cartons are available for all wine pack combinations. Armstrong Brands' Wine Shippers can accommodate a variety of standard champagne and magnum bottle diameters too. Our Wine Shippers provide an economical solution to your shipping needs

Customized packs are always another option. Let Armstrong Brands help you design a wine bottle shipper to meet your unique situation. Contact us today.
