Pocket Cooler

Great insulation with built-in pocket

Our Insulated Shipping Containers (Foam Coolers) are designed to protect your perishables during transit. Whether you are shipping your products across town or across the country, our coolers will perform safely and effectively.

Each of our molded foam coolers is manufactured with Expanded Polystyrene (EPS) foam. EPS foam (AKA Styrofoam) is composed of 98% air and because the air that surrounds us is such a poor conductor, EPS foam is the perfect insulator. Our line of insulated boxes (Foam Coolers) can protect your perishables by maintaining an inside temperature that prevents spoilage. In addition, EPS is lightweight, strong, and offers superior cushioning for delicate products.

We manufacture coolers with different lengths, widths, depths and wall thicknesses, to accommodate the variable needs of our customers. Armstrong Brands is always adding new cooler sizes to its line of foam products. Let us help you design a Foam Cooler to meet your unique situation. Contact us today.

Corrugated shipping boxes are available to accommodate each cooler size.

**Call 1-800-725-6415 or go to
www.ArmstrongBrands.com**

The foam and corrugated used in our packs are manufactured with completely recyclable and environmentally friendly materials.

Interior Dimensions:

9 1/2" x 6 1/2" x 11 1/2" deep
(not including pocket area)

Exterior Dimensions:

13 1/2" x 11 1/4" x 15 1/2" deep

Wall Thickness: 2"

Key Features

- Built-in pocket keeps paperwork dry (great for pharmaceuticals)
- 2 inch thick walls for ultimate insulation
- Sturdy form & construction
- 100% Recyclable

Inside dimensions listed are approximations of usable interior space.
